Sonoma County
Healthy and Sustainable Food Action Plan

A guide to local action on food production, land and natural resource stewardship, job development, public health and equity in our food system

County of Sonoma Department of Health Services
Sonoma County Food System Alliance
OCTOBER 2012
The time has come to join together in supporting a local, healthy, equitable and prosperous food system for Sonoma County. There is a role for every organization, business, government and person to play in building a food system that creates health and prosperity for both our people and our environment.

Building on the work of the February 2011 Sonoma County Food Forum and the July 2011 publication of the Sonoma County Community Food Assessment, the Sonoma County Food System Alliance (SCFSA) and the County of Sonoma Department of Health Services developed the Sonoma County Healthy and Sustainable Food Action Plan (Action Plan). The Action Plan provides a road map with a shared community vision and goals for the local food system. In addition, the Action Plan invites local governments, businesses, organizations, and community members to commit to action and play a role in building a viable food system for Sonoma County.

The Action Plan groups food system opportunities and concerns into four action areas: Agriculture and Natural Resources, Economic Vitality, Healthy Eating, and Social Equity. Within each action area key goals are articulated, details of policies and actions enumerated into sub-goals, and sample policies and programs described. The Actions at a Glance section outlines the four action areas, their goals and their sub-goals, providing an overview of the Action Plan document.

A Declaration of Support, sample resolution and suggestions for individual actions, and supplementary examples of actions are also included in the Action Plan. These provide the necessary tools and resources for local organizations to advance the identified food system goals. Indicators are shown for each of the eleven goals in an effort to follow trends and changes in the Sonoma County food system.

Local organizations, businesses and individuals are encouraged to sign the Declaration of Support and commit to the identified actions to help advance the Action Plan. Government agencies are encouraged to declare a resolution demonstrating their support for the vision and goals of the Action Plan and a commitment to work on identified goals.

This executive summary outlines only part of the food system framework outlined in the Sonoma County Healthy and Sustainable Action Plan. For additional information please review the chapters and appendices that follow. With a collective vision for the Sonoma County food system and the necessary tools to fulfill that vision, we can help create a strong, healthy and sustainable food system for future generations.
The Sonoma County Healthy and Sustainable Food Action Plan was made possible by the dedication and strong collaboration of members of the Sonoma County Food System Alliance Policy Committee, who are listed in alphabetical order below:

- Phina Borgeson
- Amanda Bornstein
- Autumn Buss
- Jana Hill
- James Johnson
- Wendy Krupnick
- Donna Legge
- Amy Lyle
- Tanya Narath
- Zeno Swijtink
- Beth Wyatt

Acknowledgements
The authors wish to acknowledge the helpful contributions, comments, and suggestions from members of the Sonoma County Food System Alliance and from the following individuals who were asked to comment on all or selected sections of this Action Plan:

- Craig Anderson - Landpaths
- Misti Arias - Sonoma County Agricultural Preservation and Open Space District
- Ellen Jones Bauer - Sonoma County Department of Health Services
- Jim Canterbury - Alvarado Street Bakery
- Amy Chesnut - Sonoma Land Trust
- Cathryn Couch - Ceres Community Project
- Marion Deeds - Sonoma County Human Services Department
- Paula Downing - Santa Rosa Original Farmers’ Market and Sebastopol Farmers’ Market
- Suzanne Doyle - Sierra Club
- Terry Garrett - Go Local
- Debora Hammond - Sonoma State University
- Trathen Heckman - Daily Acts
- Jana Hill - Sonoma County Department of Health Services
- Paul Kaiser - Singing Frogs Farm
- Wendy Krupnick - Community Alliance with Family Farmers
- Cathy Luellen-Aflague - Santa Rosa City Schools (retired)
- Melissa Minton - Santa Rosa Community Market
- Tanya Narath - Leadership Institute for Ecology and the Economy
- Linda Peterson - UC Cooperative Extension, Sonoma County
- Joe Pozzi - Pozzi Ranch
- Lisa Preschel - Community Member
- Jim Shelton - Shelton’s Market
- Lynn Silver Chaflin - Sonoma County Department of Health Services
- Susan Stover - Community Member
- Rick Theis - Leadership Institute for Ecology and the Economy

### Healthy Eating

| 5 | Increase equitable access to healthy, affordable, safe and culturally appropriate food and beverage choices | 5.1 Include increasing access to healthy food and beverage choices and decreasing availability of unhealthy food and beverage choices in local general plans  
5.2 Incorporate Health Impact Assessments in the review process for all projects and policies  
5.3 Support the implementation of wellness policies  
5.4 Support the implementation of policies for publicly purchased food, food available on public premises and food obtained via public contracts to make healthy food and beverage choices standard in these settings  
5.5 Support innovative strategies to increase the retail availability and affordability of healthy local food and beverages |
|---|---|---|
| 6 | Connect the food insecure with food and nutrition assistance programs | 6.1 Promote awareness and enrollment in food assistance programs  
6.2 Increase point-of-sale acceptance of CalFresh and WIC  
6.3 Connect surplus food with need |
| 7 | Increase education about local agriculture, nutrition and the impact of food and beverage choices | 7.1 Promote growing food in home, neighborhood and school settings  
7.2 Establish and expand affordable and accessible education programs for basic cooking, food preservation, nutrition skills and green practices  
7.3 Promote farm trips and know-your-farmer programs |

### Social Equity

| 8 | Address root causes of hunger and food insecurity | 8.1 Identify and support opportunities for affordable living conditions  
8.2 Support the definition and implementation of social equity criteria to be used at all levels of public policy creation |
|---|---|---|
| 9 | Create opportunity and justice for farmers, farm workers and food system workers | 9.1 Support policies to address inequities in farm and food system worker employment practices  
9.2 Promote and support businesses and products that provide opportunities for farmers and food system workers  
9.3 Support new farmers and ranchers from underrepresented groups  
9.4 Develop systems to gather ongoing, accurate data on farm and food system workers in Sonoma County |
| 10 | Ensure the inclusion of underserved and underrepresented communities | 10.1 Support the development and inclusion of community leaders from underrepresented communities in conversations and policy-making about Sonoma County’s food system  
10.2 Increase the participation of community members |
| 11 | Increase community resilience | 11.1 Improve our ability to feed ourselves from food grown and raised locally  
11.2 Support an emergency food system that meets the immediate needs of all food insecure people in Sonoma County  
11.3 Strengthen and diversify the local food system to better cope with disasters and long-term changes |

A Food System is a series of interlinked activities. Working to build a vibrant and resilient local food system requires considering all the components of the system and their relationships.
1 Introduction

Why a Healthy and Sustainable Food Action Plan?

The time has come to join together in supporting a local, healthy, equitable and prosperous food system for Sonoma County. There is a role for every individual, organization, business and government to play in building a food system that creates health and prosperity for both our people and our environment.

The Sonoma County Healthy and Sustainable Food Action Plan (Action Plan) provides a county-wide policy and programmatic framework to stimulate and coordinate improvements within our food system. By encouraging specific organizational, regulatory and legislative policy changes, the Action Plan supports the creation of a more vibrant food system for Sonoma County. In addition, the Action Plan invites local governments, businesses, organizations and community members to commit to action and play a role in building a viable food system for Sonoma County.

What Is a Food System?

A “food system” is a series of interlinked activities including food production, processing, distribution, consumption and waste management, as well as all the associated regulatory institutions and activities. Working to build a vibrant and resilient local food system requires considering all the components of the system and their relationships.

How Was the Plan Developed?

The Sonoma County Food Forum in February of 2011 turned a corner in convening over 300 people representing diverse segments of our local food system. Upon receipt of the Food Forum report in August of 2011, the County of Sonoma’s Board of Supervisors directed the County of Sonoma Department of Health Services to work with the Sonoma County Food System Alliance, County Departments, city leaders and community partners to develop the Action Plan.
Building upon existing work, the Action Plan provides a road map with a common vision. Goals and strategies of the Action Plan incorporate findings from the Sonoma County Community Food Assessment¹ and recommended areas for action from the Food Forum Report to the community². When possible, the goals and strategies in the Action Plan are aligned to recommendations from the California Health in All Policies Strategic Task Force, address key findings from the American Public Health Association Toward a Healthy, Sustainable Food System policy brief³, and correspond with the appropriate sections of the National Prevention Strategy⁴. In addition, the Action Plan reflects the following set of principles adopted by the Sonoma County Food System Alliance (SCFSA).

**Food System Principles**

1. We believe that all people in our community should have access to enough affordable, healthy, fresh and culturally appropriate food.

2. We believe that community members benefit by understanding how their food choices impact their own health, the health of the community and the world at large.

3. We believe that healthy food and agriculture sectors are central to the long-term vitality of the local economy and community.

4. We believe that farming and food system work should be economically viable and respected occupations.

5. We believe that local agriculture, food production, distribution, consumption and food waste management should work in a way that regenerates nature.

6. We believe that residents should not be inundated with unhealthy food choices like sugary drinks and junk food.

---

¹ Sonoma County Food System Alliance, Sonoma County Community Food Assessment, July 2011.
² Sonoma County Food System Alliance, Sonoma County Food Forum: Report to the Community, May 2011.
How will the Healthy and Sustainable Food Action Plan Benefit the Community?

While we envision a food system that reflects these principles, some current regulations, policies, market structures, and investments limit our ability to improve our food system. By using the Action Plan to focus collaborative efforts, we can overcome these barriers, forge new partnerships, identify shared goals and commit to action.

The Sonoma County Healthy and Sustainable Food Action Plan serves as a framework to guide our collaboration and integrate the efforts of diverse stakeholders to improve our local food system. As a guide, the Action Plan also serves to catalyze policy change, encourage investment, raise awareness of and support from our community and among policymakers, which can potentially help secure funding to implement proposed strategies.

While the Action Plan intends to be a comprehensive guide, it also serves as a living document and aims to respect the voices of all industries across the spectrum of the food system. As a living document, the Action Plan will consider the inclusion of any recommendations, new research or issues proposed during future local or regional forums focused on the food system.

How is the Action Plan organized?

The food system is large and many components are interrelated and affect one another. After much consideration, the SCFSA organized the Action Plan into:

Four Main Action Areas

1. Agriculture & Natural Resources
2. Economic Vitality
3. Healthy Eating
4. Social Equity

Each action area has a number of goals with specific sub-goals and potential strategies. While the order of the action areas, goals and sub-goals does not reflect any level of priority, it was designed to move across the levels of the food system, with each goal building from previous goals. It is also worth noting that a number of the goals and sub-goals could be appropriately placed in one or more of the four action areas.

Under each sub-goal, at least one sample strategy is highlighted. This provides the reader with a concrete example of work already being done in Sonoma County or another region to achieve this sub-goal. While only one or two examples are highlighted in the body of the document, Appendix C provides a table listing the goals, sub-goals and additional sample policies, programs and resources with their website links, providing the reader with additional sources of model programs to consider implementing, adopting or expanding locally.
Local organizations, businesses and individuals are encouraged to sign the Declaration of Support and commit to identified actions to help advance the Action Plan. Government agencies are encouraged to declare a resolution demonstrating their support for the vision and goals of the Action Plan and a commitment to work on identified goals.

The Sonoma County Food System Alliance is committed to the long-term process necessary to achieve system-wide change and will continue to leverage partnerships and strategic opportunities to reach the goals outlined in the Action Plan. The Food System Alliance plans to work with local governments, businesses, organizations and individuals to provide support and technical assistance to advance the Action Plan and reach our vision. The Call to Action highlights seven specific ways to help advance the Action Plan. Accomplishing our goal will require that government agencies, businesses, community-based organizations and individuals all work together, each of us addressing the areas and priorities that we can.
1. **Support the Vision**
Sign the Declaration of Support to show your commitment to food system changes in Sonoma County. Government agencies are encouraged to declare a resolution demonstrating your alignment and support for the vision and goals of the Action Plan.

2. **Advance These Goals**
This Action Plan represents our community’s food system priorities; use the Action Plan’s shared goals and actions as a guide when making decisions about policies, changing business practices, making investments and improving our food system. Identify a specific commitment you or your organization can make to forward these goals.

3. **Work with Others**
Supporting and enhancing a viable food system for future generations requires that all of us work together. As you identify your own areas for action, look for other individuals and organizations that could be natural partners. Joining efforts and using a collective voice will increase our ability to create policy changes and attract funding.

4. **Align Funding**
Demonstrate to granting organizations that your organization’s efforts align with the Sonoma County Healthy and Sustainable Food Action Plan. This allows funding agencies to understand that your specific efforts are part of a larger coordinated plan to shift the food system locally, demonstrating that their resources may be leveraged as a result.

5. **Incorporate these Goals into Other Community Planning Efforts**
Incorporate the Sonoma County Healthy and Sustainable Food Action Plan’s goals and actions into future community planning efforts, as well as into existing plans through updates or amendments, to ensure the development of an intentional food system that reflects our values.

6. **Make the Food System a Priority**
Use the Action Plan to frame discussions about our local food system with elected officials, policy makers, political candidates and community leaders to help elevate our food system as a community and policy priority.

7. **Make Individual Choices**
As an individual consumer we have the power to shape the market which supplies our food. Use the Individual Actions in this Action Plan to help transform our food system through the choices you make each day.
The Agriculture and Natural Resources action area is focused on:

1. Growing food and creating a local food system that supports the viability of diverse scaled farms and ranches

2. The permanent protection of land for agricultural production

3. Managing agricultural land in a way that also enhances the natural resources of the land, surrounding area and water systems

Photo by Karen Preuss
karenpreuss.com
3 Agriculture & Natural Resources

In order to have local food, we need local land on which to produce it, and that land needs to be thoughtfully managed to ensure we maintain those lands for future generations.

Sonoma County has the potential to produce large amounts of diverse types of food. However, over the past one hundred years, the variety of crops produced locally has decreased to mostly those products that can be distributed and marketed outside the county. Creating more agricultural diversity and crops for local use is central for a thriving local food system. It is important to ensure that agricultural lands are permanently protected so there will always be land available for food production.
GOAL 1

Protect and Enhance Agricultural Land Base, Farms and Ranches

1.1 Protect permanent farm and ranch land
Minimize expansion of the Urban Growth Boundaries in all nine cities through regulation, zoning, incentives, and limit conversion of agricultural land to other uses. Utilize permanent land conservation tools, such as the purchase of, or acceptance of donated, affirmative or conservation easements to permanently protect the county’s agricultural lands.

Sample Program
Metro is an elected regional government serving more than 1.5 million residents in Clackamas, Multnomah and Washington counties and the 25 cities in the Portland, Oregon region. The urban and rural reserves program identified land for future urban development to protect farms, forests and natural areas for the next half century.

1.2 Promote the use of public land for food production
Establish methods, procedures, guidelines and documentation to assess and support the lease of public land for food production.

Sample Program
The Sonoma County Land for Food Production Program is a collaborative effort across County Departments to identify County-owned land suitable for community gardens, or leasing for small farm operations and grazing.

1.3 Promote educational opportunities on farms and ranches
Support on-farm educational initiatives to promote agricultural heritage to help local farms become more economically viable.

Sample Programs
The Center for Land-Based Learning is dedicated to creating the next generation of farmers and teaching California’s youth about the importance of agriculture and watershed conservation. Combining innovative hands-on experience with classroom learning, participants in CLBL’s many programs develop leadership skills, learn how sustainable agriculture practices contribute to a healthier ecosystem, and create connections to agricultural, environmental and food system careers.

The aim of Green String Institute is to educate a new generation of farmers who respect the earth and respond to the needs of their surroundings. They strive to improve the biology of the lands that they steward while at the same time growing healthy, vibrant food that is pleasurable to eat and that brings health to their local populations.
### 1.4 Support public and private incentives for food producing land

Support public and private incentives for preservation and use of land for agricultural production, including community gardens, the sale or donation of affirmative or conservation easements to a land trust or public agency and the renting of private land for agricultural production.

**Sample Policies**

The [*Sonoma County Agricultural Preservation and Open Space District*](https://www.sonoma.ca.gov) is one of the top five farmland and open space preservation programs in the nation (Farmland Preservation Report) and the first special district established for the purpose of protecting agricultural lands. It is one of the few jurisdictions in the nation to use a sales tax for the purchase of conservation easements to protect agricultural lands and preserve open space.

The [*California Williamson Act Program*](https://www.sonoma.ca.gov) is a vital program that enables local governments to enter into contracts with private landowners for the purpose of restricting specific parcels of land to agricultural or related open space use so that farmers and ranchers can stay on their land. In return, landowners receive property tax assessments which are much lower than normal because they are based upon farming and open space uses as opposed to full market value.

### 1.5 Ensure regulatory support for food production and processing

Ensure that county and city level regulation, zoning and land use laws support healthy and sustainable food production including farms, distribution and processors, farm stands, farmers’ markets and community-supported agriculture (CSA). Support the development and continuation of an agriculture ombudsman for Sonoma County to guide producers through regulatory channels.

**Sample Policies**

In Marin, a part-time *Agricultural Ombudsman* is available to help producers work their way through permitting an on-farm or ranch project. In the nine years since the county board of supervisors begin supporting this part-time position, 76 producers and many agencies have been assisted. All but one producer was successful in permitting their project.

The [*Napa County Department of Environmental Management (DEM)*](https://www.napa.gov) and the Agriculture Commissioner developed a process for gardens to become an source to legally sell or donate produce to food retail outlets. The process entails the completion of an online self-certification to obtain an approved produce grower certificate.
## Encourage Sound Resource Management

### 2.1 Support agricultural practices that preserve and increase the top soil and it’s fertility, and that enhance riparian corridors

Provide incentives for farmers and ranchers to develop and implement land use practices that enhance riparian corridors, prevent sediment from negatively impacting the riparian resources, preserve and build top soil and increase soil fertility.

**Sample Programs**

*USDA Natural Resources Conservation Service Conservation Innovation Grants* is a voluntary program intended to stimulate the development and adoption of innovative conservation approaches and technologies while leveraging Federal investment in environmental enhancement and protection, in conjunction with agricultural production.

The *Conservation Stewardship Program* (CSP) is a voluntary conservation program that encourages producers to address resource concerns in a comprehensive manner by undertaking additional conservation activities and improving, maintaining and managing existing conservation activities. CSP is available on Tribal and private agricultural lands and non-industrial private forest land in all 50 States and the Caribbean and Pacific Islands Areas.

### 2.2 Work towards Sonoma County sustainable water use and encourage conservation practices to save water and conserve energy

Support the protection of groundwater recharge and water conservation practices. Provide incentives or support for farmers and ranchers to conserve water and energy.

**Sample Programs**

*Gold Ridge Resource Conservation District* assists landowners in addressing their environmental concerns by maintaining a presence in natural resources conservation work in all watersheds within the District.

Environmental Law and Policy Center, *Land Use Tools to Protect Groundwater: Preserving Recharge* is a document providing policy resourcing and information for groundwater recharge practices.
2.3 Create resources out of food scraps and agricultural by-products
Promote the reuse and regeneration of food waste into resources (i.e. compost, bio-gas, animal feed, etc.) and increase diversion of items no longer fit for consumption from landfills to local composting facilities or backyard composting. Promote the conversion of agricultural and silvicultural discards to mulch, compost and potentially biochar and syngas. Support a system where farmers get financial credits for building organic matter in soils.

Sample Programs
BioStar Systems Farm to Fuel Project in Santa Rosa will develop and demonstrate the viability of converting animal, agricultural and food wastes for the production of BioMethane for use in producing electricity and powering natural gas operated vehicles.

Sonoma Compost Company, under contract with the Sonoma County Waste Management Agency, operates the municipal composting program. By appointment only, self-hauled commercial vegetable food scraps are accepted for composting.

2.4 Educate and promote environmentally friendly third-party certification for local food producers
Support certification by third parties for environmentally responsible food growers and processors, and support third-party certified businesses and products. Support cost share programs to help offset the costs of certification.

Sample Programs
The California Dairy Quality Assurance Program (CDQAP) is a voluntary partnership between dairy producers, government agencies and academia to promote the health of consumers, the environment and the welfare of dairy animals. The CDQAP provides third-party certification in Environmental Stewardship through its on-farm evaluation/certification program.

California Certified Organic Farmers (CCOF) provides certification services at all stages of the organic food chain from farms to processors, restaurants and retailers. CCOF certifies to the USDA National Organic Program standards and CCOF international standards. CCOF also offers cost share information for organic certification.
<table>
<thead>
<tr>
<th>2.5</th>
<th><strong>Prioritize the regeneration of local fish and fisheries</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Support collaborative efforts and incentives to comply with Federal regulations that protect fish habitat, land use practices that keep water flowing in perennial waterways and the compliance with land use regulations that prevent agricultural chemical run-off into waterways.</td>
</tr>
</tbody>
</table>

**Sample Policies**

*Partnership agreement* between the USDA Natural Resources Conservation Service and the US Department of the Interior Fish and Wildlife Service and the Association of Fish and Wildlife Agencies to promote long term working relationship between parties to explore and establish a viable habitat credit, trading market to result in net conservation benefits.

*Sonoma County General Plan Open Space and Conservation Element* provides policy guidelines for the preservation of natural and scenic resources which contribute to the general welfare and quality of life for residents of Sonoma County and to the maintenance of its tourism industry.

<table>
<thead>
<tr>
<th>2.6</th>
<th><strong>Support and encourage crop species diversity and heirloom livestock</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Support community and regional seed and stock libraries to provide training opportunities to learn about heirloom agriculture and identify methods to preserve heirloom seeds and livestock.</td>
</tr>
</tbody>
</table>

**Sample Program**

The *West County Community Seed Exchange* is a grassroots community seed bank that supports Sonoma County gardeners with free, locally grown, open-pollinated, pesticide and GMO-free seeds.

Slow Food Russian River and 4H Collaboration is working to bring back *Heritage Turkey* breeds.

<table>
<thead>
<tr>
<th>2.7</th>
<th><strong>Enhance agricultural potential to mitigate and adapt to climate change</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Encourage energy-efficient agriculture practices and renewable energy use in agriculture and processing. Support and incentivize on-site alternative energy use and generation (e.g. solar panels on food processing plants, heat exchangers in food processing, biogassification of waste biomass, methane digesters for manure). Encourage UC Cooperative Extension and agricultural support organizations to promote incentive programs to help implement conservation practices and provide resources.</td>
</tr>
</tbody>
</table>

**Sample Programs**

*Sonoma Clean Power* is a proposal for a public-private partnership that would offer electricity from cleaner sources at rates that are competitive with those of PG&E.

*Marin Carbon Project* establishes the basis for soil carbon sequestration on local rangelands. Grazing lands on ranches and wide open spaces emphasizes the value of local soil carbon sequestration to provide ecological and agricultural benefits to rural communities while making full use of educational opportunities in regard to climate change.

**Sample Resource**

The Climate Protection Campaign published a report entitled, *Opportunities for Greenhouse Gas Emission Reduction in the Agricultural Sector of Sonoma County* outlining potential opportunities to reduce greenhouse gas emission in the agricultural sector.
2.8

Promote wildlife-friendly agricultural practices
Provide support or incentives for the implementation of wildlife-friendly agricultural practices to promote ecosystem health.

Sample Programs
The Alameda County Resource Conservation District and the Department of Fish and Game have collaboratively developed the Alameda County Voluntary Local Program (VLP). This program will provide a permitting solution for implementing voluntary conservation projects that impact species and/or their habitat that are listed by the Department under the California Endangered Species Act. The VLP is anticipated to be approved in October 2012.

Wild Farm Alliance serves to promote a healthy, viable agriculture that helps protect and restore wild nature by providing resources, case studies and conducting policy and advocacy work.

The Bee Friendly Farming initiative is an important means of raising consumer recognition and support for helping bees by (1) recognizing those who provide bee habitat (2) supporting bees by purchasing farm products and 3) displaying the local honey bearing the “Bee Friendly Farmer” logo.

INDIVIDUAL ACTIONS FOR HOME, WORK, PLAY, WORSHIP OR SCHOOL

• Support local farmers by shopping at farmers’ markets and purchasing local or regional food at grocers
• Convert your grass, parking strips or other underutilized space for food production or native plants
• Sign up to rent a plot at a local community garden
• Lease or donate underutilized and surplus land for farm operations, community gardens, or grazing
• Sign up for a community-supported agriculture (CSA) farm share
• Compost food scraps through city or county composting programs
• Buy products with minimal packaging to reduce waste and bring reusable bags when you go shopping
• Install greywater systems
The Economic Vitality action area focuses on the promotion of local food products and producers, increasing the capacity of the local supply chain (including processing, distribution, and storage) and encouraging institutions like schools and hospitals to purchase local food.

Economic vitality refers to all parts of the food system being able to remain healthy and in business over the long-term. This includes the farmers, ranchers, and fishers who produce the raw food products as well as all the various processors, distributors, retailers, and other businesses that have a role in delivering food to the consumer. In this time of national and international economic recession, supporting local farmers and local food businesses is increasingly recognized as a powerful opportunity to jump start the local economy.  

Research demonstrates that locally directed spending by consumers more than doubles the number of dollars circulating among businesses in the community, creating a local economic stimulus effect. Economists call this the "multiplier effect," because it steers more jobs and sales-tax revenue into the community. For example, in contrast to importing food to Sonoma County, if $100 million more dollars of locally-produce food was consumed in Sonoma County it would result in an additional $25 million in local economic activity.  

Several recent studies have found multiplier benefits of local businesses to be up to three times those of non-local businesses.  

5 Alicia Harvie and Hilde Steffey, Rebuilding America’s Economy with Family Farm-Centered Food Systems, (Farm Aid: June, 2010), p.12,  
7 Sonoma State University Economic Development and Innovation Accelerator, The Economics of Going Local: Oliver’s Market as a Case Study, April 2011.  
GOAL 3

Support Local Food System Jobs and Commerce

3.1 Develop, support, implement and fund “local foods” marketing efforts in order to increase demand for healthy local food

Promote Sonoma County’s reputation as being at the forefront of the local and sustainable food movement by developing and promoting a regional brand that enhances consumer education about food issues and ecological principles. Utilizing the power of buying local by developing recognition for restaurants, retail grocers and institutions that support the purchase of healthy, local food. Promoting agritourism opportunities and funding research to identify potential local food marketing opportunities that will support local economic development and job creation.

Sample Program

The Sonoma County GoLocal Cooperative is a network of locally-owned businesses, residents, non-profit organizations and government agencies working together to build a resilient, thriving, local economy by supporting local, independently owned businesses and encouraging sustainable practices. GoLocal works with local business owners and economic development staff to spot opportunities to produce locally what is consumed in Sonoma County. This “import replacement strategy” creates economic growth without the growth of consumption.

Sample Resource

The Economics of Going Local: Oliver’s Market is a case study that examines the economic impacts of using a “go local” strategy concerning business.
### 3.2 Identify and support funding and resources for existing and new farmers and ranchers
Promote education, training, and incubator programs for new farmers and ranchers while promoting resources, programs, and funding to help local families pass their agricultural business on to the next generation.

**Sample Programs**
*California Farmlink* builds family farming and conserves farmland in California by linking aspiring and retiring farmers; and promoting techniques and disseminating information that facilitate intergenerational farm transitions. This is conducted through a number of programs: Linking Program; Farmer Advocacy: Workshop and Technical Assistance; FarmLink Loan Program; Intergenerational Farm Transitions; Farmland Conservation; and Individual Development Accounts Program.

*Sonoma Land Trust* conserves scenic, natural, agricultural and open land for the future of Sonoma County by developing long term land protection strategies, promoting private and public funding for land conservation, acquiring land and conservation easements and promoting land stewardship.

*AGROprenuership - Beginning Farmers and Rancher Development Program*, managed by UC Cooperative Extension Sonoma County, provides training for beginning farmers and ranchers.

### 3.3 Expand the capacity of the local food supply chain to create more jobs in Sonoma County
Support the establishment of locally-owned and operated production, processing, agricultural supply, distribution, storage, waste recycling, and composting facilities to maximize job creation.

**Sample Program**
*Moving Food Along the Value Chain: Innovations in Regional Food Distribution.* This report examines the aggregation, distribution, and marketing of eight diverse food value chains to glean practical lessons about how they operate, the challenges they face and how they take advantage of emerging opportunities for marketing differentiated food products.

### 3.4 Support the cultivation of culturally appropriate crops
Encourage the planting and harvesting of crops that match the changing Sonoma County population in response to food preferences, food security and market opportunities.

**Sample Resource**
*Ethnic Crop Opportunities for Growers on the East Coast: A Demand Assessment.* This report examined the potential for expansion of production of ethnic crops on the U.S. East Coast by commercial farmers from a market-first and economic perspective based on consumer demand.
### Encourage Institutional Purchasing that Supports the Local Food System

<table>
<thead>
<tr>
<th>GOAL 4</th>
<th><strong>Goal 4</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Encourage Institutional Purchasing that Supports the Local Food System</strong></td>
<td><strong>Goal 4</strong></td>
</tr>
</tbody>
</table>

#### 4.1 Build preference for purchasing Sonoma County and regional products
Institute organizational and government agency policies to prefer local food in their purchasing contracts.

**Sample Policy**

*Woodbury County Local Food Purchase Policy.* A resolution stating the Woodbury County, Iowa Local Food Purchase Policy strives to increase regional per capita income, provide incentives for job creation, attract economic investment and promote the health and safety of its community. It established that Woodbury County shall purchase, by or through its food service contractor, locally produced organic food when a department of the County serves food in the usual course of business.

#### 4.2 Support and encourage a regional food hub to serve as an aggregation and distribution center to increase the market for products and stimulate more supply
Support the development of a food hub to serve as an aggregation and distribution center to promote the purchase of regional food that would drive the market to develop more supply.

**Sample Resource**

*Establishing as Aggregation and Marketing Center for California’s North Coast.* This Community Alliance with Family Farmers report presents a market analysis of the food system in California’s four North Coast counties (Sonoma, Napa, Mendocino, and Lake), with the core aim of identifying opportunities to expand local markets for food producers.

#### 4.3 Support and encourage a regional alliance of institutional food purchasers to buy from local producers in order to stimulate more supply
Support the development of a regional alliance of institutional purchasers that implements a set of purchasing goals and guidelines, model purchasing language and methods to support and promote the purchase of regional food that would drive the market to develop more supply.

**Sample Resource**

*Collective Purchase: Moving Local and Organic Foods Beyond the Niche Market,* a paper published in 2010 draws attention to the creative possibilities offered by collective purchase as a mechanism to advance beyond the niche market.

### INDIVIDUAL ACTIONS FOR HOME, WORK, PLAY, WORSHIP OR SCHOOL
- Vote with your dollar – support the local economy by eating and shopping at local businesses which keeps money circulating in the local economy and helps create jobs
- Eat at restaurants that feature locally-grown and seasonal food
- Buy local food when shopping at your retail grocer and ask the manager at your retail grocer to offer and label more regionally-produced food
- Shop at farmers’ markets and farm stands to support small family farms
- Ask decision-makers at your work, school, or faith organization to buy local food for meal services and events
- Support school boards and districts in changing institutional practices to support local food purchasing
A statewide study found that Sonoma County residents had over 3X as many fast food restaurants and convenience stores nearby as grocery stores and produce vendors.
5 Healthy Eating

The Healthy Eating action area addresses health outcomes related to food consumption and access in Sonoma County. Healthy eating is influenced by access to healthy, safe and affordable foods and beverages and by individuals’ knowledge, attitudes and culture.

Healthy eating is an important factor of a sustainable food system. Poor diet and physical inactivity contribute to a number of health conditions: obesity, type 2 diabetes, certain cancers, cardiovascular disease, high blood pressure and stroke. In Sonoma County, obesity and weight gain are serious health concerns and are more prevalent in low-income populations.

A 2008 statewide study found that Sonoma County residents had over three times as many fast food restaurants and convenience stores nearby as grocery stores and produce vendors. A more recent in-depth study of four low-income neighborhoods in Sonoma County, with a combined population of nearly 24,000 and over 50% of the Hispanic population living in poverty, found limited access to affordable, healthy food.

Instead, these neighborhoods were dominated by convenience stores and fast food outlets offering few healthy choices. Further, none of the food stores or fast food restaurants met standards for healthy food marketing. Fruit and vegetables were priced more than 10% higher than the county average and very few stores accepted WIC vouchers. Three of four neighborhoods didn’t have an accessible farmers’ market.9

---

9 Sonoma County Department of Health Services, Communities of Excellence Food Assessment (CX3), February, 2010.
### Goal 5

**Increase Equitable Access to Healthy, Affordable, Safe and Culturally Appropriate Food and Beverage Choices, while Decreasing Availability of Unhealthy Choices in Neighborhoods, Schools and Work Places**

#### 5.1 Include increasing access to healthy food and beverage choices and decreasing availability of unhealthy food and beverage choices as a goal in local general plans

Incorporate as goals in local general plans, including transit infrastructure to ensure access points to healthy food.

**Sample Policy**

*Marin County General Plan* focuses on public health goals, including strategies to increase access to healthy food.

#### 5.2 Incorporate Health Impact Assessments in the review process for all projects and policies

Adopt the use of Health Impact Assessments to evaluate the potential health effects of a project or policy before it is built or implemented. Health impact assessments (HIA) typically involve a combination of procedures, methods and tools by which a policy, program or project may be judged as to its potential effects on the health of a population, and the distribution of those effects within the population. Impact of a project on the healthfulness of the food environment is an important assessment.

**Sample Resource**

*UCLA Health Impact Assessment Clearinghouse Learning and Information Center* collects and disseminate information on health impact assessment (HIA) in the United States.

#### 5.3 Support the implementation of wellness policies

Create and support healthy food environments where people work, play, worship and learn in order to make the healthy choice the easiest choice.

**Sample Program**

The *Sonoma County iWORKwell Recognition Program* is a voluntary certification program that recognizes employers for developing and implementing exceptional employee wellness programs. Employers are awarded Bronze, Silver or Gold classification based on the depth of their employee wellness initiatives.
### 5.4 Support the implementation of policies for publicly purchased food, food available on public premises and food obtained via public contracts to make healthy food and beverage choices standard in these settings

**Sample Programs**
The Santa Clara County Public Health Department food and beverage policy went into effect July 1, 2012. The standards are required for county meetings, events, vending machines and custodial populations, including: Department of Correction, Department of Probation, Social Services Agency and Santa Clara Valley Medical Center. The standards are recommended for cafeterias, cafes, and county-leased properties.

*New York City has a Food Procurement Policy* that outlines standards for any food purchased or served on government property. The standards are separated into Standards for Purchased Food, Standards for Meals and Snacks Served and Agency and Population-Specific Standards and Exceptions.

### 5.5 Support innovative strategies to increase the retail availability and affordability of healthy, local food and beverages to decrease the prominence of unhealthy options

**Sample Policies**
*New York City Food Retail Expansion to Support Health (FRESH) Program.* FRESH provides zoning and financial incentives to promote the establishment and retention of neighborhood grocery stores in underserved communities throughout the five boroughs.

The *City of Richmond “Soda Tax”* ballot measure on November 6, 2012 for voters in the City or Richmond. The measure, if approved by the city’s voters, will impose a “business license fee” of 1 cent per ounce on sugar-sweetened beverages sold within city limits.
6.1 Promote awareness and enrollment in food assistance programs
Promote awareness of and enrollment in existing assistance programs which are currently underused with targeted outreach to increase use of CalFresh, WIC, the National School Lunch Program and the Senior Nutrition Program to increase healthy eating.

Sample Program
Fruit and Vegetable Prescription Program, spearheaded by the Santa Rosa Family Medicine Residency Program, is a research trial that examines the effects of giving low-income women at risk for gestational diabetes mellitus (GDM) physician-prescribed vouchers for fruits and vegetables at the Santa Rosa farmers’ market.

6.2 Increase point-of-sale acceptance of CalFresh and WIC
Encourage acceptance of food assistance vouchers at farmers’ markets, community-supported agriculture (CSA) farms, farm stands and senior food meal programs. Seek matching funds (private and government) to expand the programs purchasing dollars.

Sample Program
CSAs in New York State: Profiles exploring how New York’s farmers are providing low-income families with healthy, fresh, and nutritious fruits and vegetables

6.3 Connect surplus food with need
Expand food bank donation channels and gleaning programs to interested communities and food pantries. Work with regulatory agencies to secure approved methods to use and distribute surplus food.

Sample Programs
Farm to Pantry is a community of volunteers dedicated to providing fresh, healthy and affordable food to everyone. Volunteers live and glean in Sonoma County where there is a growing community of farmers, gardeners and residents dedicated to ensuring fresh, healthy food for everyone.

Food Runners picks up excess perishable and prepared food from businesses such as restaurants, caterers, bakeries, hospitals, event planners, corporate cafeterias and hotels and delivers it directly to shelters and neighborhood programs that feed the hungry.
GOAL 7

Increase Education About Local Agriculture, Nutrition and the Impact of Food and Beverage Choices

7.1 Promote food growing in home, neighborhood and school settings

Connect community members with information and resources to grow their own food.

Sample Programs

**Sonoma County School Garden Network** provides students with opportunities to establish a life-long dedication to the environment and their communities, to develop healthy understanding of nutrition, and to further their academic achievement through hands-on learning.

**iGROW Sonoma** is an online resource tool to encourage people to grow their own food, connect experience gardeners to beginning growers, strengthen the community by sharing food and life skills, and helping people find local sources of healthy food.

The **Sonoma County Master Gardener Food Gardening Specialist** program was started in the spring of 2010 with the mission of teaching beginning gardeners how to successfully start and maintain food gardens. The group’s initial focus will be on teaching neighborhood workshops.

Sample Policy

**City of Seattle Community Garden Policy.** Since 1992, the City of Seattle’s Comprehensive plan has required one dedicated community garden for each 2,500 households.

7.2 Establish and expand affordable and accessible education programs for basic cooking, food preservation, nutrition skills and green practices

Identify and support educational programs with funding, space, promotion and other resources in order to expand their accessibility, especially in low-income and underserved areas.

Sample Programs

**Ceres Community Project** offers free and low-cost classes on nutrition and healthy cooking. Their teen service project teaches teens about growing, preparing and eating fresh healthy food by having the teens grow food and prepare meals for families dealing with serious illness.

**Devils Gulch Ranch Educational Services** provides agriculture and nature educational programs to diverse communities. These programs develop the skills needed to produce food and to live sustainable while building an understanding of our interconnection with nature.
7.3 Promote farm trips and know-your-farmer programs
Encourage community members, students and others to connect with local farmers and food producers through promotion of those producers and with special events throughout the year.

Sample Programs
Sonoma County Farm Bureau Ag Days has grown into a major event to represent the many facets of Sonoma County agriculture. The event moves the farm to the city for two days of animal exhibits, agricultural demonstrations and hands-on experiences and is geared for school children from kindergarten through sixth grade.

Sonoma County Farm Trails works to ensure the preservation of Sonoma County’s rich agricultural heritage through organized retail opportunities, marketing and public relations campaigns and educational forums.

INDIVIDUAL ACTIONS FOR HOME, WORK, PLAY, WORSHIP OR SCHOOL
• Participate in, encourage and support your workplace or school’s wellness initiatives
• Support efforts to remove unhealthy food and beverages from vending machines within your workplace, school or place of worship
• Plant a vegetable garden at home or in your community to grow some of your own food
• Drink tap water rather than sodas, sugar sweetened coffee drinks or bottled water, and encourage consumption of healthy beverages in your school, work place or place of worship
• Keep a “soda-free” home or office
• Join the “Plant a Row” campaign and grow extra food for community food banks
• Support and shop at neighborhood retail grocers and restaurants serving healthy, affordable, locally grown and culturally appropriate food
• Ask convenience stores in your neighborhood to voluntarily remove or reduce outdoor marketing of unhealthy food like candy and soda, and to stock more healthy food choices
• Attend or teach a healthy cooking or eating class
The Social Equity action area explores the root causes of hunger and food insecurity. The long-term health of our community will require more than just increasing access to food and nutrition assistance programs. This section of the Food Action Plan looks at opportunities to address system-wide inequalities in our community that ultimately lead to hunger and food insecurity.

Creating system-wide change includes working to ensure that all individuals have the tools and resources they need to make healthy food and lifestyle choices, as well as equal opportunities to shape food system priorities and goals. A socially equitable food system protects the rights of farmers and farm workers, and upholds the dignity and quality of life for all who work in the food system through healthy living and working conditions. According to Occupations Employment Statistics, most food system and farm workers in Sonoma County earn significantly less than the county average. These reported wages are close to the Federal Poverty Level for a family of four.
### Goal 8

**Address Root Causes of Hunger and Food Insecurity**

#### 8.1 Identify and support opportunities for affordable living conditions

Advance affordable housing, health care, transportation and healthy food retail choices for all community members and promote a living wage.

**Sample Policies**

- *Transportation and Food: The Importance of Access* is a Policy Brief of the Center for Food and Justice, Urban and Environmental Policy Institute October 2002

- *City of Sonoma Living Wage Ordinance*, passed in 2004, assures that city employees, employees of city service contractors, subcontractors, and employees and contractors of city financial assistance earn an hourly wage that is sufficient to live with dignity and to achieve economic self-sufficiency

#### 8.2 Support the definition and implementation of social equity criteria to be used at all levels of public policy creation

Develop social equity criteria in relation to food equity and health, and incorporate into local and regional decisions to ensure policies and public investments support social equity.

**Sample Resource**

The *King County Equity Impact Review (EIR)* tool is a process to identify, evaluate and communicate the potential impact - both positive and negative - of a policy or program on equity.

### Goal 9

**Create Opportunity and Justice for Farmers, Farm Workers and Food System Workers**

#### 9.1 Support policies to address inequities in farm and food system worker employment practices

Support federal, state and regional public policy efforts that address the roots of inequity for farmers and farm workers, such as extending equal protection under the Fair Labor Standards Act, Fair Trade Act, immigration reform, and farm subsidies title in the Farm Bill.

**Sample Resource**

*Association of Farm Worker Opportunity Programs* provides information, reports, educational resources, job training programs and advocacy for farm workers.
| 9.2 | **Promote and support businesses and products that provide opportunities for farmers and food system workers**  
Sample Programs  
*Swanton Berry Farm* is considered a model of fair agricultural labor practices. Workers are guaranteed a decent pay scale as well as benefits such as health insurance, a retirement plan, and paid time off, plus access to affordable housing. The farm helps workers avoid repetitive strain injuries (the most common type of injuries in agriculture) by offering a variety of work. In addition, Swanton makes an effort to involve workers in business decisions and was also the first farm to offer its employees the opportunity to own stock in the company.  
*Food Justice Certification* is a domestic fair trade label that represents the gold standard for social justice in agricultural and food jobs with it’s rigorous third party certification. It is a system based on the experiences and input of the farmers, farm workers and business owners.  
*Food Alliance Certification* works to promote sustainable agriculture and to ensure safe and fair working conditions, human treatment of animals and careful stewardship of ecosystems. Through a series of eight guiding principles, the organization provides certification for production of crops, livestock, farmed shellfish, and nursery, greenhouse and food handing operations. |
| 9.3 | **Support new farmers and ranchers from underrepresented groups**  
Develop and support farm mentorship programs, farmer incubator programs, and organizations that increase access to capital for producers; especially for new and socially-disadvantaged farmers and farm workers.  
**Sample Programs**  
*Agriculture and Land-Based Training Association* (ALBA) provides educational and business opportunities for farm workers and aspiring farmers to grow and sell crops grown on two organic farms in Monterey County, California.  
*Sonoma County Beginning Farmer and Rancher Development Program* is a nine-month program with classes once a month at Santa Rosa Junior College's Shone Farm. It covers a range of farm and ranch operations, tools and resources, basic business planning, accounting and finance, and is taught by agriculture and business instructors with support from Small Business Development Center counselors. There is a 25% participation goal for traditionally underrepresented farmers or ranchers. |
| 9.4 | **Develop systems to gather ongoing accurate data on farm and food system workers in Sonoma County**  
Develop and implement a process to gather and track local data on farm and food system workers in Sonoma County to ensure informed policy and positive program development.  
**Sample Resource**  
*Food Insecurity among Farm Workers in the Salinas Valley, California.* This report provides information on farm workers in the Salinas Valley. |
<table>
<thead>
<tr>
<th>GOAL 10</th>
<th>Ensure the Inclusion of Underserved and Underrepresented Communities in Conversations and Policy-Making About Sonoma County’s Food System</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>10.1</strong></td>
<td><strong>Support the development and inclusion of community leaders from underrepresented communities</strong>&lt;br&gt;Support the power of existing leaders within underrepresented communities so they can build community involvement in defining and supporting community-wide food-related goals. Offer training sessions to community members on how to organize and become involved in government decision-making around food issues.&lt;br&gt;&lt;br&gt;<strong>Sample Programs</strong>&lt;br&gt;The <em>North Bay Organizing Project</em> unites people to build leadership and grassroots power for social, economic, racial and environmental justice.&lt;br&gt;&lt;br&gt;<em>St. Joseph Health System of Sonoma County</em> community organizers help disenfranchised community members gain the influence necessary to achieve real and lasting change in their neighborhoods and communities.</td>
</tr>
<tr>
<td><strong>10.2</strong></td>
<td><strong>Increase the participation of community members from underrepresented communities</strong>&lt;br&gt;Practice effective community engagement strategies, such as different communication methods and the use of different languages in order to reach a broader audience.&lt;br&gt;&lt;br&gt;<strong>Sample Policy</strong>&lt;br&gt;<em>Devonport City Council Draft Community Engagement Policy</em> is a draft policy seeking to increase community participation in its decision making processes.&lt;br&gt;&lt;br&gt;<strong>Sample Program</strong>&lt;br&gt;<em>Portland Office of Neighborhoods Diversity and Civic Leadership Program</em> provides aims to develop culturally appropriate engagement strategies in city governance structures, communication structures, leadership development and representation in city public involvement efforts, and encouragement of collaboration between underrepresented community organizations, neighborhood and business associations where there may be opportunities to work on common community and neighborhood livability issues.</td>
</tr>
</tbody>
</table>
## Increase Community Resilience

### II.1 Improve our ability to feed ourselves from food grown and raised locally

**Sample Policies**

Maine “Food Sovereignty” policy entitled the *Local Food and Community Self-Governance Ordinance of 2011*. This ordinance gives the town residents the right to produce, process, sell, purchase, and consume local foods to promote self-reliance, the preservation of family farms and local processing.

*The People’s Food Policy Project* has developed Resetting the Table, a concrete food sovereignty policy for local communities in Canada. A policy framework that reflects the common values of health, justice and sustainability.

### II.2 Support an emergency food system that meets the immediate needs of all food insecure people in Sonoma County

Promote and support public and private collaboration to provide more comprehensive food assistance through the major types of organizations (emergency kitchens, food pantries, food banks, food rescue organizations, and emergency food organizations). Support the maintenance of a food donation program and system to gather excess crops that would otherwise go unused for hunger-relief organizations.

**Sample Resources**

The *Redwood Empire Food Bank* provides food through three Hunger Relief Initiatives that focus on the unmet needs of low-income children, seniors and working families. They are also a primary source of food for 166 community based charitable organizations that operate 249 human service programs helping the needy, disabled and homeless in Sonoma County. REFB administers The Emergency Food Assistance Program (TEFAP) for Sonoma County.
### 11.3 Strengthen and diversify the local food system to better cope with disasters and long-term changes

Promote advanced planning that will enable crop and livestock farmers to prevent or reduce the effects of natural disaster on their farms, prepare for the financial impacts of a natural disaster, and improve the resilience of their farms following a natural disaster or other conditions brought on by ecological and political crises.

**Sample Resource**

*Washington State Department of Agricultural Disaster Assistance Brochure* provides assistance for producers to report damage and lost production to the local USDA Farm Service Agency office.

Enhance emergency preparedness related to food access and distribution triggered by social, political, chemical, biological and/or radiological incidents to establish regional capacity for feeding the local population or massive population migrations for 2-3 months in an emergency. This includes relief to food producers, handlers and consumers.

**Sample Policy**

*City of San Francisco Precautionary Principle Resolution.* Resolution supporting the precautionary principle and requesting the Department of the Environment to prepare and submit legislation proposing the adoption of the precautionary principle as a general City policy and integrating a precautionary principle approach into the City’s existing process for the purchase of commodities for the Board of Supervisor’s consideration.

---

### INDIVIDUAL ACTIONS FOR HOME, WORK, PLAY, WORSHIP OR SCHOOL

- Support anti-discrimination practices at work, school, and in your community
- Request that all community planning that affects your neighborhood address health and food system issues
- Organize community and neighborhood action around healthy food access for everyone
- Donate to CalFresh farmers’ markets matching funds
- Donate eligible surplus food to community food banks
- Participate in a gleaner program as a donor or volunteer
- Support a living wage and safe working conditions for all workers
22 indicators by Sonoma County Health Action were selected to reach the goal of being the healthiest county in California by 2020.
From the outset, the Sonoma County Food System Alliance and the Sonoma County Department of Health Services recognized the need for a way to indicate change in the food system so we can measure progress.

**Ultimately, 8 criteria were used in identifying indicators to track the food system in Sonoma County.**

1. **Opportunities-based:** the indicator measures progress toward the goals (positive) rather than regression away from the goals (negative)
2. **Countywide:** when possible, the indicator data must be available for Sonoma County, rather than for the U.S. or the state of California
3. **Measureable:** the indicator data must be quantifiable
4. **Available:** the data must be available to the public
5. **Cost-effective:** it must be possible to access the data with little monetary input
6. **Stable, reliable, credible:** the data must be from a reliable and credible source, collected in a consistent way and replicable from one time period to the next
7. **Understandable and usable:** the indicator must be easily grasped by readers
8. **Sensitive to change:** the indicator must respond to change over a reasonable period of time (not take hundreds of years to show progress)

The selected indicators outlined next meet the identified criteria and, when possible, align with Health Action indicators to ensure shared measurement across initiatives and foster collaboration across policies and programs. The indicators will be tracked over time, allowing the SCFSA to follow trends, identify opportunities for action, and recognize gaps and successes. If new reliable data becomes readily available, new indicators that meet the criteria may be added to this list over time. While many indicators could be listed under each goal, this section intentionally outlines a manageable number to measure progress toward a healthy and sustainable food system in Sonoma County.

See Appendix D for more information on the rationale for selecting indicators and data sources.

***Not something that is regularly tracked, but the Food System Alliance hopes to identify a method for tracking this goal and secure resources for implementing an evaluation system*
CONTENTS

APPENDIX A DECLARATION OF SUPPORT 48

APPENDIX B COUNTY/CITY RESOLUTION TEMPLATE 49

APPENDIX C POLICIES AND PROGRAMS 50

APPENDIX D SELECTED INDICATORS 80
All residents of Sonoma County have a voice in the future of our food system - every eater, backyard gardener, home cook and professional chef, urban and rural farmer, food processor and distributor, emergency food provider, grocer, and market vendor. It is critical that we combine efforts to make effective change in food system policy, practice, and programs.

We, the undersigned, support the vision and principles of the Sonoma County Healthy and Sustainable Food Action Plan.

### VISION

We envision a county in which everyone has access to affordable, nutritious food. Local farms and operations play a primary role in producing that food. Each part of the food system, from seed to table and back to soil, is environmentally regenerative, economically viable, and supports a healthy life for all members of our community.

### Therefore, we believe:

1. All people in our community should have access to enough affordable, healthful, fresh and culturally appropriate food.

2. Residents should not be inundated with unhealthy food choices like sugary drinks and junk food.

3. Community members should understand how their food choices impact their own health, and the health of the community and the larger world.

4. Healthy food and agriculture sectors are central to the long-term vitality of the local economy.

5. Farming and food system work should be economically viable and respected occupations.

6. Local agriculture, food production, distribution, consumption and food waste management should work in a way that regenerates nature.

I/We will commit to do the following:

Choose the goals you support within the Action Plan

[insert goals]

Please detail which strategies (within goals) of the Sonoma County Healthy and Sustainable Food Action Plan you support.

(Example: Action 1.2 - …) 

Comments:

---

Thank you for your support of the Sonoma County Healthy and Sustainable Food Action Plan!
Local governments are invited to use this template as they develop a resolution supporting the Sonoma County Healthy and Sustainable Food Action Plan and committing to action. Jurisdictions are encouraged to use their own wording and their own resolution format as appropriate.

**Sonoma County Healthy and Sustainable Food Action Plan Resolution**

Resolution No:

Resolution of [jurisdiction]

The following sample WHEREAS statements can be used in whole or in part depending on which parts of the Healthy and Sustainable Food Action Plan aligns best with the jurisdiction and what commitments are made.

WHEREAS, the [jurisdiction] declares its commitment to increasing the amount of healthy and sustainable food in order to achieve access to safe, nutritious, and culturally acceptable food, essential to human health; and

WHEREAS, the [jurisdiction] recognizes that supporting a local sustainable food system makes farming more economically viable keeping farmers in business and ensuring the preservation of farmland; and

WHEREAS, the [jurisdiction] recognizes that hunger, food insecurity, and poor nutrition are pressing health issues that require action; and

WHEREAS, the [jurisdiction] recognizes that sustainable food systems ensure nutritious food for all people, protect workers health and welfare, minimize environment impacts, and strengthen connections between urban and rural communities; and

WHEREAS, the following principles guide this Resolution on Healthy and Sustainable Food:

• All people in our community should have access to enough affordable, healthful, fresh, and culturally appropriate food.
• Residents should not be inundated with unhealthy food choices like sugary drinks and junk food.
• Community members should understand how their food choices impact their own health, and the health of the community and the larger world.
• Healthy food and agriculture sectors are central to the long-term vitality of the local economy.
• Farming and food system work should be economically viable and respected occupations.
• Local agriculture, food production, distribution, consumption, and food waste management should work in a way that regenerates nature.

WHEREAS, the [jurisdiction] shall advance the Sonoma County Healthy and Sustainable Food Action Plan by supporting the following goal(s) of the Action Plan:

• [insert goals jurisdiction commits to advance or align with]

NOW, THEREFORE, BE IT RESOLVED that the [jurisdiction] agrees to support and advance the Sonoma County Healthy and Sustainable Food Action Plan.
The following appendix provides additional policies, programs, and toolkits for each sub-goal of the Sonoma County Healthy and Sustainable Food Action Plan. This section is intended to provide a larger library of resources for local governments, organizations, businesses, and individuals to advance the Sonoma County Healthy and Sustainable Action Plan. This is not an exhaustive archive, but rather a diverse array of existing efforts for stakeholders to learn from, explore, and potentially adapt at the local level.

**Agriculture & Natural Resources**

**Address Root Causes of Hunger and Food Insecurity**

| 4.2 | Support and encourage a regional food hub to serve as an aggregation and distribution center to increase the market for products and stimulate more supply |
| | The Intervale Food Hub is the leader in the national movement to establish successful, farmer-focused food hubs and has seen 80% annual growth in sales for farmers over a two year period. [http://www.intervale.org/what-we-do/intervale-food-hub/food-hub-impacts/](http://www.intervale.org/what-we-do/intervale-food-hub/food-hub-impacts/) |
| | Increasing farm income and local food access: A case study of a collaborative aggregation, marketing, and distribution strategy that links farmers to markets is a recently published article from the Journal of Agriculture, Food Systems, and Community Development that provides a case study on food hub models. [http://www.agdevjournal.com/attachments/article/189/JAFSCD_Collaborative_Aggregation_August-2011.pdf](http://www.agdevjournal.com/attachments/article/189/JAFSCD_Collaborative_Aggregation_August-2011.pdf) |
| | The Regional Food Hub Resource Guide provides a collection of information, resources, and background on everything needed to develop or participate in a regional food hub. The guide presents a series of key questions about the current state of food hub development and examples from operating food hubs. [http://www.ams.usda.gov/AMSv1.0/getfile?dDocName=STELPRDC5097957](http://www.ams.usda.gov/AMSv1.0/getfile?dDocName=STELPRDC5097957) |
| | The NGFN Food Hub Collaboration is a partnership between Wallace Center at Winrock International, USDA, National Good Food Network, and others. The Collaboration is working to ensure the success of existing and emerging food hubs in the US by building capacity through connection, outreach, research, technical assistance and partnerships. [http://www.wallacecenter.org/our-work/current-initiatives/food-hub-collaboration](http://www.wallacecenter.org/our-work/current-initiatives/food-hub-collaboration) |
### 4.3 Support and encourage a regional alliance of institutional food purchasers to buy from local producers in order to stimulate more supply

Farm Fresh for ME is a newly established initiative of the Maine Department of Agriculture in collaboration with Western Mountains Alliance and other for-profit and NGO’s who are supporting development of food buying clubs throughout Maine. Funding from USDA and the Maine Department of Agriculture helped Farm Fresh for ME pilot an innovative buying club model in Readfield where Maranacook Area School’s support enabled student involvement in the project and a distribution site at Maranacook Middle School. [http://fffme.com/](http://fffme.com/)

Cooperative Food Buying Club Primer is an article providing background information on food buying clubs. [http://www.vegfamily.com/articles/coop-food-buying.htm](http://www.vegfamily.com/articles/coop-food-buying.htm)

---

### Healthy Eating

*Increase equitable access to healthy, affordable, safe and culturally appropriate food and beverage choices, while decreasing availability of unhealthy food and beverage choices in neighborhoods, schools and work places*

<table>
<thead>
<tr>
<th>GOAL 5</th>
<th>Sub-goal</th>
<th>Policy, Program, Toolkit, or Resource</th>
</tr>
</thead>
</table>
| 5.1    | Include increasing access to healthy food and beverage choices and decreasing availability of unhealthy food and beverage choices as a goal in local general plans | City of Dillingham Comprehensive Plan Update and Waterfront Plan addresses food related goals, strategies, implementation timeline, and responsible entity within the energy section of the plan. [http://www.agnewbeck.com/pdf/bristolbay/Dillingham_Comp_Plan/Comp_Plan/DLG_Comp_Plan_Ch_1.pdf](http://www.agnewbeck.com/pdf/bristolbay/Dillingham_Comp_Plan/Comp_Plan/DLG_Comp_Plan_Ch_1.pdf)

The 2030 Harrison County Comprehensive Plan addresses food in a section dedicated to public health including goals, strategies, and actions to increase access to healthy food options. [http://www.planharrisoncounty.org/index.htm](http://www.planharrisoncounty.org/index.htm)

Cassidy A, & Patterson, B. The Planner’s Guide to the Urban Food System is meant to help planners better understand the food system and how food affects and if affected by urban planning. [http://postcarboncities.net/files/PlannersGuidetotheFoodSystem.pdf](http://postcarboncities.net/files/PlannersGuidetotheFoodSystem.pdf)

American Planning Association. Policy Guide on Community and Regional Food Planning presents seven general policies, each divided into several specific policies. For each specific policy, a number of roles planners can play are suggested. [http://www.planning.org/policy/guides/pdf/foodplanning.pdf](http://www.planning.org/policy/guides/pdf/foodplanning.pdf)

City of Hartford Bus Route Creation for Supermarket Accessibility provides an article on the accomplishments of creating a bus route directly connecting north Hartford residents to affordable food stores, cutting their travel time in half. [http://www.whyhunger.org/frontend.php/overlay/simpleIndex?id=113](http://www.whyhunger.org/frontend.php/overlay/simpleIndex?id=113)

How to Create and Implement Healthy General Plans is a toolkit that details a wide range of strategies for incorporating health in a general plan. Model health language is included to provide specific ideas for how to address health concerns through general plan policies. [http://changelabsolutions.org/publications/toolkit-how-create-and-implement-healthy-general-plans](http://changelabsolutions.org/publications/toolkit-how-create-and-implement-healthy-general-plans)
| 5.1 | General Plans and Zoning: A toolkit for building healthy, vibrant communities provides an introductory understanding of how land use decisions are made and how advocates can participate in those decisions.  

Laying a Foundation for a Local Food System in California: A Survey of Policy and Legal Impacts. This publication provides an overview of legal considerations when developing policies to support a local food system.  
[http://www.vividpicture.net/documents/18_Laying_Foundation.pdf](http://www.vividpicture.net/documents/18_Laying_Foundation.pdf)  

Incorporating policies for a healthy food system into land use planning: The Case of Waterloo Region, Canada. This case study discusses the region of Waterloo, Ontario, Canada, where recent revisions to the Regional Official Plan now include a suite specific land use policies related to food.  
|---|---|
| 5.2 | **Incorporate Health Impact Assessments in the review process for all projects and policies**  
Zoning for a Healthy Baltimore: A Health Impact Assessment of the Transform, Baltimore Comprehensive Zoning Code Rewrite evaluated the potential health effects of Baltimore City’s comprehensive zoning code rewrite (known as TransForm Baltimore).  

Planning for Healthy Neighborhoods: Include Food Infrastructure in The City’s Environmental Review was a 2009 proposal by Manhattan Borough President Scott M. Stringer to ensure that decision-makers were fully informed about potential unanticipated consequences of planning on local food systems.  
| 5.3 | **Support the implementation of wellness policies**  
New York City Food Standards was developed by Executive Order to establish nutritional standards for meals/snacks purchased and served standards for beverage vending machines, and standards for food vending machines  

School Nutrition Association Sample Wellness & Nutrition Policies provides a number of sample policies from school districts across the country  
5.4 Support the implementation of policies for publicly purchased food, food available on public premises, and food obtained via public contracts to make healthy food and beverage choices standard in these settings

Examples of State and Local Food Procurement Policies is a Center for Science in the Public Interest document outlining state and local procurement policies as a guide to other national models. [www.cspinet.org/new/pdf/state_policy_descriptions.pdf](http://www.cspinet.org/new/pdf/state_policy_descriptions.pdf)

The Boston Public Health Commission’s Healthy Beverage Toolkit is intended to help municipal agencies, healthcare institutions, colleges and universities, community-based organizations, retail establishments and other organizations implement policies and practices that encourage healthy lifestyles for their employees, clients, students and visitors. [http://www.bphc.org/programs/cib/chronicdisease/healthybeverages/Forms%20%20Documents/toolkit/HealthyBeverageToolkitFinal.pdf](http://www.bphc.org/programs/cib/chronicdisease/healthybeverages/Forms%20%20Documents/toolkit/HealthyBeverageToolkitFinal.pdf)

| 5.5 | **Support innovative strategies to increase the availability and affordability of healthy, local food and beverages to decrease the prominence of unhealthy options** |

Getting to Grocery: Tools for Attracting Healthy Food Retail to Underserved Neighborhoods is a toolkit to help advocates and public health agencies coordinate and leverage the tools available through local government and other organizations to bring grocery stores into low-income communities. [http://changelabsolutions.org/publications/getting-grocery](http://changelabsolutions.org/publications/getting-grocery)

Healthy Food Financing Initiative National Information supports projects that increase access to healthy, affordable food in communities that currently lack these options. HFFI attracts investment in underserved communities by providing critical loan and grant financing. [http://www.acf.hhs.gov/programs/ocs/ocs_food.html](http://www.acf.hhs.gov/programs/ocs/ocs_food.html)

A Healthy Food Financing Initiative: An Innovative Approach to Improve Health and Spark Economic Development. A report from PolicyLink. This two-page fact sheet outlines HFFI and other promising strategies to improve access to fresh, healthy food. [www.policylink.org/site/apps/nlnet/content2.aspx?c=IkIXLbMNJrE&b=5136581&ct=8047759](http://www.policylink.org/site/apps/nlnet/content2.aspx?c=IkIXLbMNJrE&b=5136581&ct=8047759)

Rethink Your Drink is a California Department of Public Health Education Campaign to promote drinking water flavored with fresh fruit, vegetables, and herbs. [http://www.cdph.ca.gov/programs/wicworks/Pages/WICRethinkYourDrink.aspx](http://www.cdph.ca.gov/programs/wicworks/Pages/WICRethinkYourDrink.aspx)

California FreshWorks Fund. A public-private partnership loan fund created to increase access to healthy food in underserved communities; spur economic development that supports healthy communities; and inspire innovation in healthy food retailing. [http://www.policylink.org/site/c.lkIXLbMNJrE/b.7718759/k.684E/California_FreshWorks_Fund.htm](http://www.policylink.org/site/c.lkIXLbMNJrE/b.7718759/k.684E/California_FreshWorks_Fund.htm)

National Policy & Legal Analysis Network to Prevent Childhood Obesity (NPLAN), Establishing Land Use Protections for Farmers’ Markets These policies include our “Model Comprehensive Plan Language to Protect and Expand Farmers’ Markets” and “Model Zoning Ordinance Establishing Farmers’ Markets as Permitted Use,” which can be used to remove policy barriers, protect and optimize farmers’ markets, and increase access for low-income customers. [http://nplanonline.org/products/establishing-land-use-protections-farmers-markets](http://nplanonline.org/products/establishing-land-use-protections-farmers-markets)
PolicyLink Farmers’ Market Tool provides resources and case studies for developing successful farmers’ markets in low-income neighborhoods. Policy Link Grocery Store Development Tool provides a toolkit for developing grocery stores in underserved neighborhoods. [http://www.policylink.org/site/c.lkIXLbMNJrE/b.7677113/k.84E6/Grocery_Store_Development.htm](http://www.policylink.org/site/c.lkIXLbMNJrE/b.7677113/k.84E6/Grocery_Store_Development.htm)

PolicyLink Corner Store Tool provides a toolkit and case studies for developing healthy corner stores in underserved neighborhoods. [http://www.policylink.org/site/c.lkIXLbMNJrE/b.7676977/k.9E6C/Corner_Stores.htm](http://www.policylink.org/site/c.lkIXLbMNJrE/b.7676977/k.9E6C/Corner_Stores.htm)

Model Healthy Food Zone Ordinance, Public Health Law & Policy provides model policy language for creating healthy food zones around schools. [http://changelabsolutions.org/node/3207](http://changelabsolutions.org/node/3207)

Model Produce Cart Ordinance provides a sample ordinance detailing model vendor requirements and rules, as well as a range of possible incentives (for example, priority consideration during the permit application process, discount permit fees, lower interest rate small business loans, and small business counseling and technical assistance) a local government may provide to encourage vendors to sell in neighborhoods that lack other sources of fresh produce. [http://changelabsolutions.org/node/3216](http://changelabsolutions.org/node/3216)

Green for Greens: Finding Public Financing for Healthy Food Retail. This guide provides a general overview of economic development and ideas for how to approach economic development agencies with healthy food retail proposals. It also provides a comprehensive overview of local, state, and federal economic development programs that have been or could be used for healthy food retail projects. [http://changelabsolutions.org/publications/green-greens-finding-public-financing-healthy-food-retail](http://changelabsolutions.org/publications/green-greens-finding-public-financing-healthy-food-retail)

ENACT is an online resource of local policies that provide strategies for healthy eating and activity. [http://eatbettermovemore.org/sa/policies/](http://eatbettermovemore.org/sa/policies/)

5.5

Buy Fresh, Buy Local. When can governments give preference to locally grown food? A guide that provides an overview of the factors affecting whether a state or local agency may procure locally produced food and agricultural products. [http://changelabsolutions.org/publications/local-food-local-government](http://changelabsolutions.org/publications/local-food-local-government)

Putting Business to Work for Health: Incentive Policies for the Private Sector. This paper provides an overview of possible business incentive-based policies to enhance access to healthy food and public health. [http://changelabsolutions.org/publications/putting-business-work-health](http://changelabsolutions.org/publications/putting-business-work-health)

District Policy Establishing a Healthy Vending Program provides model language for healthy vending standards. [http://changelabsolutions.org/publications/district-policy-establishing-healthy-vending-program](http://changelabsolutions.org/publications/district-policy-establishing-healthy-vending-program)

County of Monterey, Healthy Vending Machine Policy provides model policy language for Monterey’s healthy vending machine policy. [http://www.co.monterey.ca.us/admin/pdfs/HealthyVendingPolicy.pdf](http://www.co.monterey.ca.us/admin/pdfs/HealthyVendingPolicy.pdf)

Fast-Food Consumption and the Ban on Advertising Targeting Children: The Quebec Experience. This paper studies the effect of banning fast food advertising targeting children. [http://works.bepress.com/kathy_baylis/33/](http://works.bepress.com/kathy_baylis/33/)

Santa Clara County provides articles discussing the policies to an toys from unhealthy kids meals in both jurisdictions. [http://www.sfgate.com/cgi-bin/article.cgi?f=/c/a/2010/04/27/MNLA1D5QFV.DTL](http://www.sfgate.com/cgi-bin/article.cgi?f=/c/a/2010/04/27/MNLA1D5QFV.DTL)

Regulating Food Retail for Obesity Prevention: How Far Can Cities Go?, Journal of Law, Medicine & Ethics, Spring 2011. This article seeks to explain the legal authority of cities and counties to enact retail food related policies. [http://www.rwjf.org/coverage/product.jsp?id=72019](http://www.rwjf.org/coverage/product.jsp?id=72019)

The City of Vancouver expanded their street food options through a pilot program to provide more diverse culinary options on Vancouver streets, promote small business growth, increase the availability of healthy and local food choices, and increase activity in the public realm. [http://vancouver.ca/commsvcs/socialplanning/initiatives/foodpolicy/projects/streetfood.htm](http://vancouver.ca/commsvcs/socialplanning/initiatives/foodpolicy/projects/streetfood.htm)

Urban Edible Landscaping, Orchards, and Fruiting Street Trees in the U.S. Summary Including Land Tenure and Liability Arrangements. This report provides a summary of free tree policies and programs in cities and counties across the country.
